

Contributors to This Issue

A. J. Ciesielka, B.S.E., 1967, Drexel University; M.S.E.E., 1968, Stanford University; Bell Laboratories, 1967—. At Bell Laboratories, Mr. Ciesielka first worked on *PICTUREPHONE*® video signal formats and video objectives. He later headed a group responsible for *PICTUREPHONE* network planning, performing economic and technical studies of video network configurations. In 1974, he began his present assignment, supervising a group responsible for planning new loop electronic systems, including voice frequency range extension and pair gain systems. This work involves both economic and technical studies of new technologies to lower the costs of providing loops. Member, Tau Beta Pi, IEEE.

Donald C. Douglas, B.S.Ch.E., 1958, The Pennsylvania State University; M.S.E.E., 1960, Georgia Institute of Technology; Bell Laboratories, 1960—. After joining Bell Laboratories, Mr. Douglas worked on various systems engineering projects related to ballistic missile defense. From 1969 to 1972, he was involved in radio system feasibility studies for toll and loop applications. Since 1972, he has been a member of the Loop Transmissions Systems Design Department, where his assignments have included pair gain system applications studies, introduction of new systems to the operating companies, and modeling pair gain system impact on the existing loop plant.

Corrado Dragone, Laurea in E.E., 1961, Padua University (Italy); Libera Docenza, 1968, Ministero della Pubblica Istruzione (Italy); Bell Laboratories, 1961—. Mr. Dragone has been engaged in experimental and theoretical work on microwave antennas and solid-state power sources. He is currently concerned with problems involving electromagnetic wave propagation and microwave antennas.

Michael J. Gans, B.S. (E.E.), 1957, Notre Dame University; M.S., 1961, Ph.D. (E.E.) 1965, University of California, Berkeley; Bell Laboratories, 1966—. At Bell Laboratories, Mr. Gans has been engaged in research on antennas for mobile radio and satellite communications.

B. R. Eichenbaum, B.S. 1963, City College of New York; M.S. 1965, Ph.D. 1969, New York University; Bell Laboratories, 1972—. Mr. Eichenbaum has worked on a variety of optical fiber development problems in the areas of coating materials, coating application techniques, ribbon fabrication, and fiber mechanics. He is currently developing new ribbons, cables, and field stripping procedures. Member, Optical Society of America.

Warren L. G. Koontz, B.S.E.E., 1966, University of Maryland; M.S.E.E., 1967, Massachusetts Institute of Technology; Ph.D., 1971, Purdue University; Bell Laboratories, 1966—. In June 1966, Mr. Koontz joined the Electronic Switching Division of Bell Laboratories and participated in the Graduate Study Program. From 1968 to 1971 he was a Graduate Instructor at Purdue University. During the summers of 1969 and 1970, he worked at Bell Laboratories, Indianapolis, and in 1971 he returned to Whippany as a member of the Loop Transmission Division. He is currently supervisor of the Project Studies group. Member, Sigma Xi, Tau Beta Pi, Eta Kappa Nu, Omicron Delta Kappa, Phi Kappa Phi.

Raymond B. Kummer, B.S. (Physics), 1970, Southwestern at Memphis; Ph.D. (Physics), 1975, University of Florida; Bell Laboratories, 1975—. Mr. Kummer joined Bell Laboratories in 1975 as a Postdoctoral Fellow working in the area of Low Temperature Solid State Physics. Since 1977 he has been a member of the Fiber Optic Transmission Media Department, where he is currently engaged in exploratory optical fiber splicing and system-related studies. Member, Optical Society of America, Sigma Xi, Sigma Pi Sigma.

K. S. Liu, B.S., National Taiwan University; Ph.D. (Physics), 1972, Cornell University; Bell Laboratories, 1974—. Mr. Liu has done research in low-temperature and statistical physics as a post-doctoral associate at Cornell University and New York University from 1972 to 1974. He has been involved in modeling and analysis of telephone network performance and customer behavior characteristics and is currently engaged in new services planning.

Lawrence A. Shepp, B.S., Applied Mathematics, 1958, Brooklyn Polytechnic Institute; M.A., Ph.D., 1961, Princeton University; Bell Laboratories, 1962—. Mr. Shepp is a member of the Mathematical Studies Department within the Mathematics and Statistics Research Center. His main fields of interest are probability theory and computerized tomography. He is currently Adjunct Professor at Columbia University, Department of Radiology. Fellow IMS.

David Slepian, M.A., 1946, Ph.D., 1949 (theoretical physics), Harvard University; Bell Laboratories, 1950—. Mr. Slepian is Head of the Mathematical Studies Department within the Mathematics and Statistics Research Center. He has worked in a variety of areas of applied mathematics and has served as a consultant on many Bell System projects. His main fields of applied interest are information theory and applications of probability theory to communication engineering. He is currently also Professor of Electrical Engineering at the University of Hawaii, Honolulu, where he periodically spends time on leave from the Laboratories. Member, National Academy of Sciences, National Academy of Engineering, and Society for Industrial and Applied Mathematics. Fellow, IEEE, the Institute of Mathematical Statistics, and American Association for the Advancement of Science.

Steven G. Ungar, B.E., 1966, The Cooper Union School of Engineering; M.S., 1967, Stanford University; Ph.D., 1972, Stanford University, all in Electrical Engineering; Bell Laboratories, 1977—. Mr. Ungar is currently involved in studying the interaction of lightning and the telephone plant in the Electrical Protection and Interference Department. Member, Tau Beta Pi, Eta Kappa Nu.

Aaron D. Wyner, B.S., 1960, Queens College; B.S.E.E., 1960, M.S., 1961, and Ph.D., 1963, Columbia University; Bell Laboratories, 1963—. Mr. Wyner has been doing research in various aspects of information and communication theory and related mathematical problems. He is presently Head of the Communications Analysis Research Department. He spent the year 1969–1970 visiting the Department of Applied Mathematics, Weizmann Institute of Science, Rehovot, Israel, and the Faculty of Electrical Engineering, the Technion, Haifa, Israel, on a Guggenheim Foundation Fellowship. He has also been a full- and part-time faculty member at Columbia University and the Polytechnic Institute of Brooklyn. He has been chairman of the Metropolitan New York Chapter of the IEEE Information Theory Group, has served as an associate editor of the Group's Transactions, and has served as co-chairperson of two international symposia. In 1976, he was president of the IEEE Information Theory Group. Fellow, IEEE; member, AAAS, Tau Beta Pi, Eta Kappa Nu, Sigma Xi.
